

Northern Accent Roses

Ole, Lena, Sven, and Sigrid

With tags that say "Ya, You Betcha" and "Uff-da" you know these roses belong in Minnesota. Developed by the University of Minnesota at the Horticultural Research Center, Northern Accent Roses are as hardy and disease resistant as you can get for northern gardens.

Sven

Growing Northern Accent Roses

Like other roses, Northern Accents prefer full sun and well-drained soil. But, unlike other types of roses, they can survive a Minnesota winter (zones 4-9) with no extra protection. Northern Accent roses die back to the ground every winter, so they stay at a compact 2-3' tall during the growing season.

The flowers of these rose are smaller than other varieties at only 1-2" across, but they bloom profusely in clusters throughout the summer.

Malmberg's is committed to providing quality, locally grown plants and personal service. Stop by any of our three locations and let our knowledgeable staff assist you in finding the perfect flower, plant or accent piece to turn your space into your own personal garden retreat.

13166 Johnson Memorial Dr.
Shakopee, MN 55379
(952) 233-2700

"Planting Directions: One end smells good. Ya put the udder in da dirt. Then make sure ya give it some vater every vonce in a vile."

- Bailey Nurseries

Varieties

Ole

Semi-double, blush pink flowers that fade to white. Has the greatest number of flowers among the varieties and a more spreading growth habit. About 2-2.5' tall and 3' wide.

Ole

Lena

Filly pink and white single flowers. The most disease resistant of the group. Grows to about 2.5' tall.

Lena

Sven

Mauve to purple double flowers that are darker and larger in cooler weather. The most fragrant variety. 2.5-3' tall.

Sigrid

Sigrid

New for 2011! Large clusters of red, double flowers. Grows to about 3.5' tall.
